

Flood Risk Management (Scotland) Act 2009

Solway Local Plan District

Local Flood Risk Management Plan

FINAL REPORT

Published on 22nd December 2022 by:

Dumfries and Galloway Council

Lead Local Authority for the Solway Local Plan District

In partnership with:

Terms and conditions

Ownership:

All intellectual property rights FINAL REPORT Local Flood Risk Management Plan are owned by Dumfries and Galloway Council, SEPA or its licensors. The FINAL REPORT Local Flood Risk Management Plan cannot be used for or related to any commercial, business or other income generating purpose or activity, nor by value added resellers. You must not copy, assign, transfer, distribute, modify, create derived products or reverse engineer the FINAL REPORT Local Flood Risk Management Plan in any way except where previously agreed with Dumfries and Galloway Council or SEPA. Your use of the FINAL REPORT Local Flood Risk Management Plan must not be detrimental to Dumfries and Galloway Council or SEPA or other responsible authority, its activities or the environment.

Warranties and Indemnities:

All reasonable effort has been made to ensure that the FINAL REPORT Local Flood Risk Management Plan is accurate for its intended purpose, no warranty is given by Dumfries and Galloway Council or SEPA in this regard. Whilst all reasonable effort has been made to ensure that the FINAL REPORT Local Flood Risk Management Plan are up to date, complete and accurate at the time of publication, no guarantee is given in this regard and ultimate responsibility lies with you to validate any information given. Dumfries and Galloway Council or SEPA will not be responsible if the information contained in the FINAL REPORT Local Flood Risk Management Plan are misinterpreted or misused by you.

Data Protection:

You agree not to use the FINAL REPORT Local Flood Risk Management Plan in any way that constitutes a breach of the Data Protection Act 2018.

No Partnership or Agency:

Nothing in these Terms and Conditions are intended to, or shall be deemed to, establish any partnership or joint venture between you and Dumfries and Galloway Council or SEPA or other responsible authority.

No Interference:

Nothing within these Terms and Conditions interferes with the statutory rights or obligations of you or Dumfries and Galloway Council or SEPA or other responsible authority.

Jurisdiction:

These Terms and Conditions are governed by Scots law and in the event of any dispute you agree to submit to the exclusive jurisdiction of the Scottish Courts.

Summary Solway Local Flood Risk Management Plan

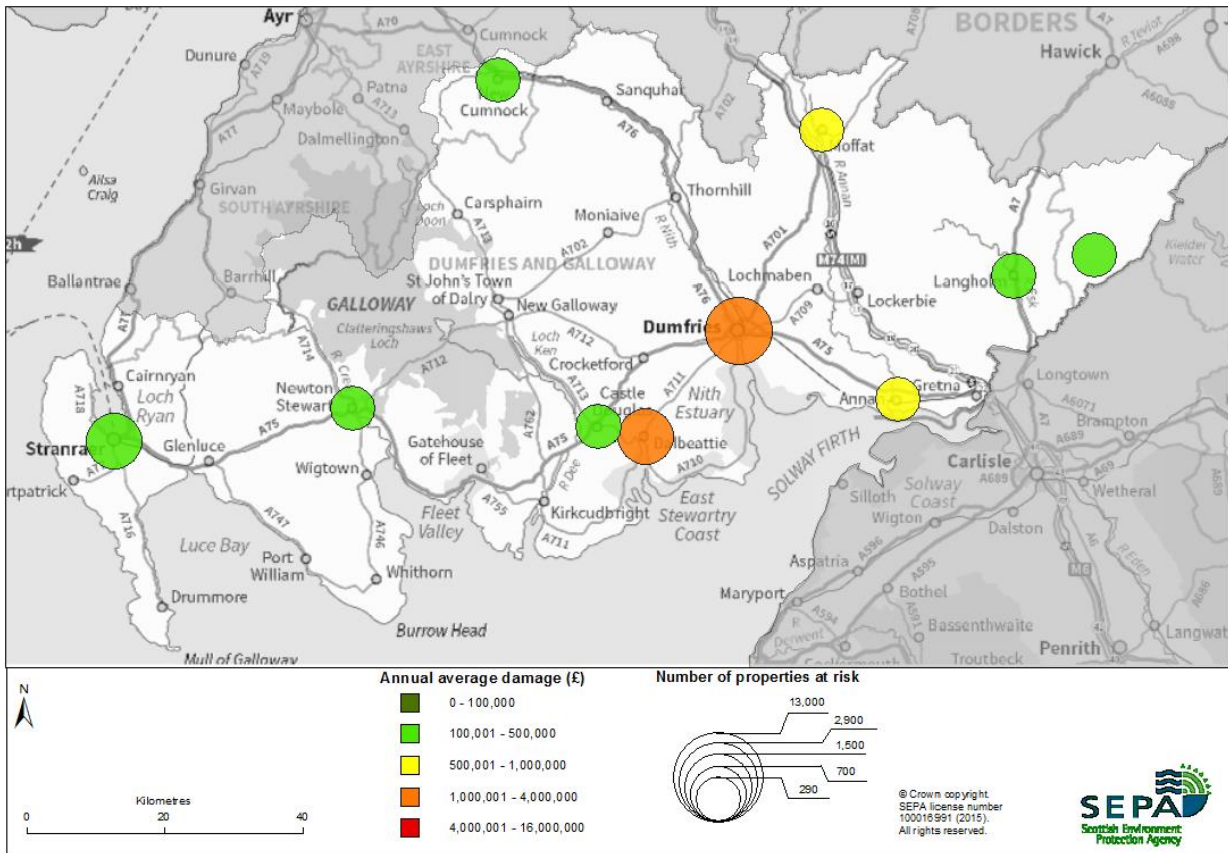

Figure 1: Map of flooding impacts. (Reproduced from Solway Local Plan District Local Plan District Flood Risk Management Strategy, SEPA (December 2015))

The Solway Local Plan District covers the south-west of mainland Scotland. It contains five local authorities; Dumfries and Galloway; South Ayrshire; East Ayrshire; Scottish Borders and South Lanarkshire. There are 26 Potentially Vulnerable Areas in the Local Plan District, 24 of these are located in Dumfries and Galloway; one in East Ayrshire; and one in Scottish Borders. The Plan District area covers an area approximately 6,426km².

Table 1: Action List

Foreword

This FINAL REPORT to the Local Flood Risk Management Plan shows the progress made in delivering actions to avoid and reduce the risk of flooding, and to prepare and protect ourselves and our communities across the Local Plan District.

“The impacts of flooding experienced by individuals, communities and businesses can be devastating and long lasting. It is vital that we continue to reduce the risk of any such future events and improve Scotland's ability to manage and recover from any events which do occur.”

(Solway Local Plan District Local Flood Risk Management Plan, June 2016)

The publication of the FINAL REPORT demonstrates the long-term coordinated and collaborative efforts of public bodies to deliver sustainable outcomes.

The FINAL REPORT is published by Dumfries and Galloway Council on behalf of a partnership comprising three local authorities: Dumfries and Galloway Council; East Ayrshire Council and Scottish Borders Council; as well as Scottish Water; SEPA; and Forestry and Land Scotland.

Individuals are the first line of defense against flooding and have responsibilities to protect themselves from flooding. Through self-help and property flood resilience measures, awareness raising and registering with Floodline, individuals, businesses and communities can and have made key contributions to the delivery of the actions in the Plan, which are detailed in this FINAL REPORT.

Since publication of the Plan in June 2016, public sector finances in Scotland have continued to be under considerable pressure, even more so with the impact of the pandemic and most recently the cost-of-living crisis. This places an even greater responsibility on SEPA, local authorities, Scottish Water, and other responsible authorities to deliver their flood risk management responsibilities and, in particular the actions in the Plan, to manage flooding in a sustainable way.

SEPA, local authorities, Scottish Water and other responsible authorities will continue to work collaboratively to implement the actions in the Plan to its conclusion in June 2022.

Background

The FINAL REPORT is a legal requirement of the Flood Risk Management (Scotland) Act 2009 (Section 38). The FINAL REPORT is required to be published on 22 December 2022. The FINAL REPORT includes the conclusions of a review of the Solway Local Plan District Local Flood Risk Management Plan (the 'Plan'), published in June 2016 and includes information on the progress towards implementing actions identified in the Plan.

Further details on flood risk management responsibilities in Scotland and the legal requirement for the publication of this FINAL REPORT can be found in Appendix 1.

A copy of the Solway Local Plan District Local Flood Risk Management Plan can be found at the follow link <http://www.dumgal.gov.uk/flooding> and http://apps.sepa.org.uk/frmstrategies/pdf/lpd/LPD_14_Overview.pdf

Review of the plan

This section sets out conclusions of the Plan review, and a summary of action delivery progress detailed in Solway Local Plan District Local Flood Risk Management Plan.

Key progress in reducing the impacts of flooding since publication

- Following public consultation, the Council confirmed the preferred scheme for Whitesands. Over 300 objections were received, and the Council therefore requested Scottish Government hold a Public Local Inquiry (PLI). The PLI began in November 2018 and concluded with written submissions in January 2019. The reporter submitted their report to Scottish Ministers who subsequently approved the scheme to progress in March 2020. The next step will be to carry out detailed design once the Council has appointed a consultant.
- Works towards a flood protection scheme for Langholm began in August 2018 with the appointment of a consultant to identify a preferred option which was presented to the community.
- A preferred option was identified for Newton Stewart flood protection scheme, and following public consultation and committee approval, outline design has progressed in preparation for publication of the scheme in early 2023.
- A flood risk appraisal of Moffat was undertaken in late 2017 / early 2018, with the final report published in August 2018. The report identified a series of flood mitigation measures, however for the 1 in 200-year standard of protection, a favorable benefit-cost ratio (BCR) was not evident.
- The Shoreline Management Plan has been progressed. Public consultation was undertaken between June and September 2022 on the draft Shoreline Management Plan. Final publication will be early 2023 following committee approval.
- New Cumnock Flood Prevention Scheme is due to complete construction in early 2023.
- Works on the Newcastleton Flood Study are nearing completion, and the Final Appraisal Reports was completed.
- Newcastleton Surface Water Management Plan was completed in 2019.
- SEPA launched five new flood warning services for the Solway Local Plan District; Upper Nith at Kirckonnel, River Cree, River Esk at Langholm and for the Solway Firth coast.
- Dumfries and Galloway Council and Scottish Borders Council continue to operate a Subsidy Scheme offering property flood resilience measures at a discounted cost to the business and residential properties across the region. Over 550 properties across Dumfries and Galloway have purchased property flood resilience measures to date.
- Stranraer Flood Protection works are programmed to be complete by summer 2023.

How current is the Plan?

The Plan was published in June 2016 supplementing the Flood Risk Management Strategy published by SEPA in December 2015. The Plan details how the actions identified in the Strategy were to be implemented over the period 2016 to 2022. The Strategy and Plan are based on the National Flood Risk Assessment and the designated Potentially Vulnerable Areas at that time.

Since the identification of the actions in the Plan, there have, and continue to be, advancements in our knowledge and development of assessment techniques. These include the publication by SEPA of a new National Flood Risk Assessment and revised designation of Potentially Vulnerable Areas in December 2018. These advancements have informed the delivery of actions in this Plan and will be used in the development of future Strategies and Plans.

It is therefore considered that the Plan on which this is the FINAL REPORT, is current, albeit the planned delivery, and actual delivery, has changed for some actions as detailed in the 'Assessment of the progress of actions'.

Significant issues

Based on a review of the assessment of the progress of actions detailed in this FINAL REPORT, the following key themes and issues have been identified that have or may have an impact on the delivery of actions to manage flood risk. Arrangements planned to deliver the remaining actions are described below. Where these issues have had an impact on the delivery of specific actions or actions across an LPD, this is detailed in the 'Assessment of the progress of actions'.

However, the overall delivery of actions in the Plan has been impacted by resource issues in both staffing and consultancy service. The Covid-19 Pandemic has also had a significant impact on a number of Actions.

Significant weather events

The Solway Local Plan District LPD was adversely affected by a number of significant weather events notably, in late 2015, October 2021 and February 2022 which had knock on impacts on the delivery of actions in the Plan from June 2016 onwards. For example, Dumfries and Galloway Council, East Ayrshire Council and Scottish Borders Council resources were deployed to deal with the emergency events at that time as well as the follow up activities and necessary works, *which were still being delivered into financial year 2016 / 17*. This caused consequential delays in the planned delivery of actions as staff resource, which would have been delivering planned actions, had been delivering emergent actions.

Arrangements planned to deliver the remaining actions affected by significant weather events are described below and detailed in the 'Assessment of the progress of actions' section of this FINAL REPORT.

Funding

The actions in the Plan to meet agreed goals and objectives in the first six-year cycle considered what would be achievable assuming a similar level of funding for flood risk management activities from The Scottish Government. However, given the timing of spending reviews and annualised financial settlements for local government, the actual ability to deliver all the actions set in the Strategies in December 2015 and detailed in the Plan was dependent on the availability of the necessary funding in each year of the six-year Plan'.

The level of funding from Scottish Government for flood risk activities for the first years of the six-year Plan has been at the levels anticipated. As per the principals of financial settlements for local government, the funding is not 'ring fenced' and local authorities may have allocated these funds to the delivery of other priorities.

Local Authorities have undergone a significant review of capital and revenue funding. Resulting changes reduced funding towards flood risk management leading to some actions being delayed. Dumfries and Galloway Council has continued to fund the requirements of the Solway LFRMP to the levels outlined by Scottish Government while balancing priorities.

The Dumfries and Galloway Council's Flood Risk Management Team has been under-resourced on occasions due to staff secondments and difficulties in recruitment. Dumfries and Galloway Council's Flood Risk Management Team continued to progress actions in the plan (funding and resources permitted).

Dumfries and Galloway Council has prioritised its resources to support ongoing Flood Scheme development, Flood Studies and delivery statutory duties.

Allocation of Resources

The availability and retention of skilled staff from other council services to support flood risk actions has been a limiting factor in some areas. This has caused consequential delays in the planned delivery of actions.

Use of Consultants

The availability and performance of consultants and professional advisors has been a limiting factor in some areas. This has caused consequential delays in the planned delivery of actions. In particular the council has had difficulties with tender returns and retention of staff within appointed consultants.

Cost increases

Delays to the anticipated timescales of scheme delivery as published in the Cycle 1 Plan have resulted in cost increases for all three flood protection schemes.

Solway Local Plan District Local Flood Risk Management Plan 2016-2022: FINAL REPORT

The Whitesands project costs have increased as a result of the Public Local Inquiry, and the delay in appointing a consultant to design and deliver the scheme following the Scottish Ministers decision to confirm the scheme will have consequential impact on costs. Costs have increased from the estimated £30.84M to £35.5M.

Initial costs of Langholm Flood Protection Scheme were based on a 1:25 year return period standard of protection (SoP) with an estimated cost of £2M. Following a review of the hydraulic model by SEPA, an error was identified and rectified which led to an increase in the numbers of properties at risk. As a consequence, it was determined that the most economically advantageous scheme was one offering a 1:200-year return period SoP, and subsequently the estimated costs rose to £8.6M to protect 264 properties.

The initial flood study for Newton Stewart highlighted a positive benefit-cost ratio (BCR) was only achievable for Newton Stewart and did not include Minnigaff. Further investigations during the outline design stage demonstrated that in protecting both Newton Stewart and Minnigaff, a positive BCR was achieved. As a result of providing defenses to a more extensive area within Newton Stewart to include Minnigaff, the scheme costs rose from £7.9m to approximately £16.4M.

The Covid-19 Pandemic

The global Covid-19 pandemic had significant impacts on service delivery nationally and internationally. This has significantly impacted the delivery of Cycle 1 Plan actions, in particular, the progress of flood protection schemes, flood modelling and the Shoreline Management Plan.

Due to national 'lockdowns' and subsequent restrictions, council staff were redeployed to facilitate national and local response, consultancy staff were placed on furlough, traditional methods of community engagement were not viable.

The Solway local plan partnership has continued to work together and progress actions though there have been many additional challenges through impacts of the pandemic on every aspect of life and the economy.

Other actions

Working in partnership with Scottish Water, Forestry and Land Scotland and other organisations and stakeholders brings additional challenges as funding cycles, priorities and resource allocations are not necessarily aligned to allow projects to proceed within the planned timescales.

On 24 December 2020, SEPA was subject to a serious and complex cyber-attack, which significantly impacted the organisation, staff, public and private partners, and the communities who rely on SEPA's services. Since the attack, SEPA has worked with Scottish Government, Police Scotland, the National Cyber Security Centre (NCSC) and the Scottish Business Resilience Centre (SBRC), to a clear recovery strategy. The incident has, however, temporarily impacted progress on a number of actions

Solway Local Plan District Local Flood Risk Management Plan 2016-2022: FINAL REPORT

such as new flood warnings, mapping and modelling projects and some engagement activities. Many of these projects are still going ahead but the timescales for them have been adjusted.

Prioritisation of actions for next plan cycle

Many actions contained in the plan are to undertake studies that will assess the need for further actions to be implemented in future plans. For example, a flood protection study may recommend that a community resilience group is set up to increase resilience to flooding, or that flood defenses are constructed. This introduces a deadline date by when such actions need to be detailed and submitted by responsible authorities for consideration as actions in the next plans from 2022-28. The deadline date for submission of these actions to SEPA was set as December 2019. The actions submitted were assessed and prioritised against the flood risk Objectives and consulted upon ahead of the publication of the next cycle of Flood Risk Management Strategies in December 2021 and Local Flood Risk Management Plans in December 2022. Any actions that missed this deadline may therefore be delayed for consideration in the next cycle from 2028-34.

Arrangements planned to deliver the remaining actions

On-going actions in the Plan will continue to be delivered into the next planning cycle period. This will be as per the published Plan, subject to revisions in delivery dates as detailed in the 'Assessment of the progress of actions' section of this FINAL REPORT.

The majority of actions in the Plan will be delivered by December 2022.

Where specific measures have been required to address a delay and ensure an action is completed then this is described against the relevant action. In addition, where remaining actions will not be delivered by the end of the Plan, contingencies have been agreed which are described against the relevant action.

Next steps

The second subsequent local Flood Risk Management Plan is currently in development for publication in December 2022. Some actions from the first Plan, particularly continuous actions such as clearance and repair works and watercourse inspections will be carried forward to continue in the new plan. Delivery of Cycle 1 flood protection schemes will continue into Cycle 2 delivery timeframe.

In the meantime, to find out more about how flood risk is being managed across the partnership please visit:

[Flooding – Dumfries and Galloway Council \(dumgal.gov.uk\)](http://dumgal.gov.uk)

[Flood Risk Management Plans – SEPA](#)

[Flooding – East Ayrshire Council \(east-ayrshire.gov.uk\)](http://east-ayrshire.gov.uk)

Conclusions

This FINAL REPORT provides details on the progress that has been made in implementing the measures identified in the Plan, six years after publication.

In general, significant measurable progress has been made by all responsible authorities across the Local Plan District.

The number of prioritised actions, including promoting and completing a number of Flood Protection Schemes and works in the Plan published in June 2016 was ambitious. Issues around resource, timing, funding and restrictions relating to the pandemic have all had an effect on the progress of some actions during this cycle. As a result of significant flooding events, where the need has been identified, additional work has been carried out.

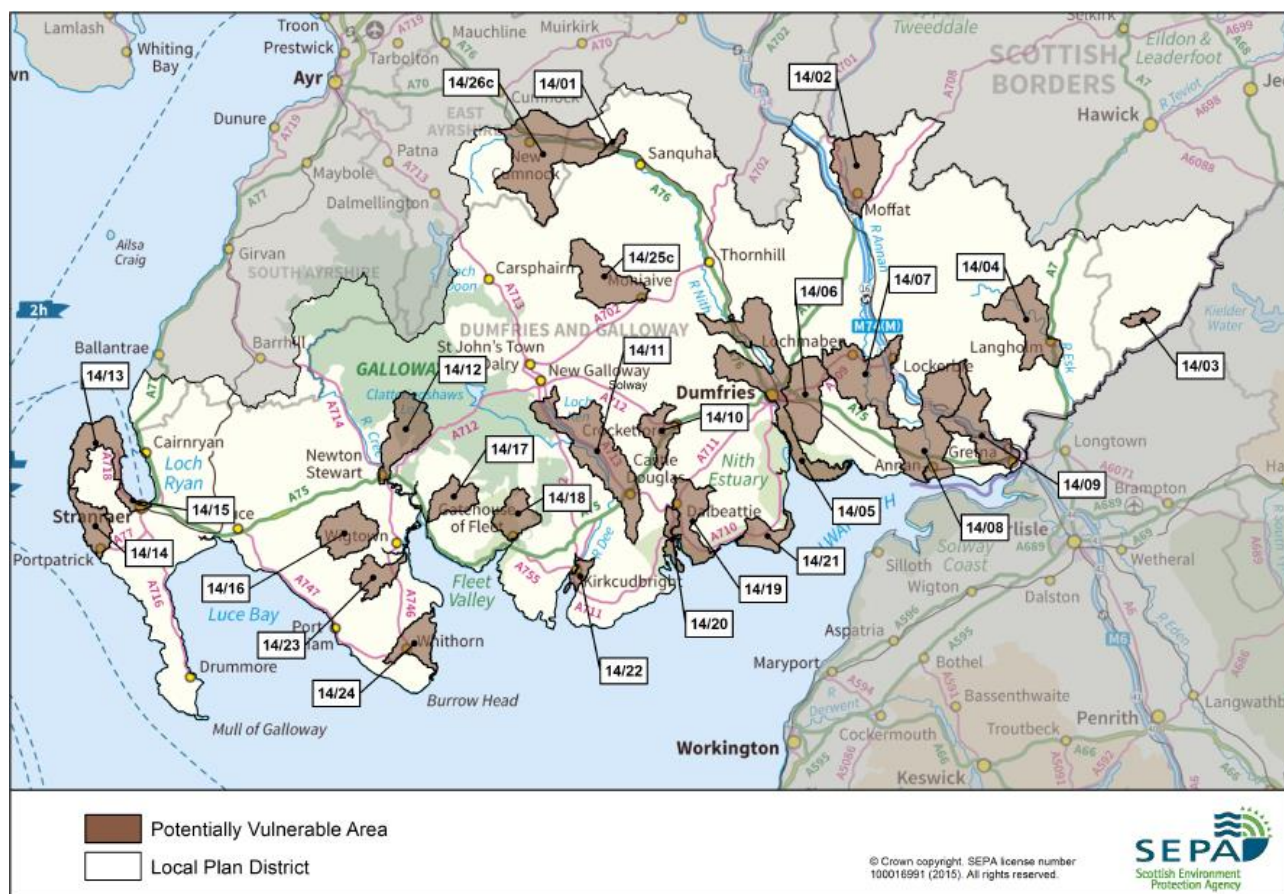

In conclusion, the Local Flood Risk Management Plan (2016-2022) remains current and relevant. Dumfries and Galloway, East Ayrshire and Scottish Borders Councils along with SEPA, Scottish Water and other responsible authorities have worked collaboratively in progressing the delivery of actions contained in the Solway Local Flood Risk Management Plan under challenging circumstances.

Implementation of the Solway Local Flood Risk Management Plan has, and will, continue to reduce risk for communities across the Solway Local Plan District which fully encompasses Dumfries and Galloway and gives strategic direction for the management of flood risk now and in the future.

Assessment of progress

This section sets out an assessment of the progress towards implementing the actions set out in the LFRMP.

There are actions that apply across the whole of the Solway LPD and actions that are specific to each of the 26 Potentially Vulnerable Areas (as defined under Section 13 of the Act) in the Solway LPD, which are shown in figure below.

Reproduced from Solway Local Plan District Local Plan District Flood Risk Management Strategy, SEPA (December 2015)

The actions that apply to individual PVA across the Solway LPD are shown overleaf in Table 1. The summary of the assessment of progress is shown using the traffic light system, where each item is marked as Red, Amber or Green (RAG) and where:

- **GREEN** – Action has been completed.
- **AMBER** – Action has commenced but has not progressed as far as envisaged in the Plan.
- **RED** – Action has not commenced.

Table 2: Summary of progress of actions to manage flood risk in Potentially Vulnerable Areas of the Solway Local Plan District

Progress with LPD-wide Actions

This section sets out an assessment of the progress towards implementing actions that apply across the whole of the Solway LPD over all years of the six-year Plan, which is presented in Table 3 overleaf.

| Action | Status | Description | Delivery Lead | FINAL REPORT | Planned actions to complete / address delay |
|--------------------------|--------|---|-------------------------|--|--|
| Flood forecasting | G | <p>The Scottish Flood Forecasting Service is a partnership between SEPA and the Met Office. The service continues to produce a daily, national flood guidance statement, issued to emergency responders, local authorities, and other organisations with flood risk management duties. In 2022 a new 3-day daily Scottish Flood Forecast was launched for the public.</p> <p>As the flood warning authority for Scotland SEPA continues to provide its flood warning service issuing flood alerts and warnings when required, giving people a better chance of reducing the impact of flooding on their home or business.</p> | SEPA | <p>Upper Nith / Cree / Esk / Solway Firth – Update Whitesands SEPA has continued to operate the Scottish Flood Forecasting Service (SFFS) Partnership with the Met Office with daily, national Flood Guidance Statements issued to Category 1 and 2 agencies (such as emergency responders, local authorities and other organisations with flooding management duties) and regional Flood Alerts issued to the public. Each daily statement gives an assessment of the risk of flooding for the next five days to enable these organisations to put preparations in place to reduce the impact of flooding. SEPA's Flood Alert service is freely available to everyone and enables communities to be aware and prepared to reduce the impacts of flooding.</p> | <p>SEPA will continue and improve the Scottish Flood Forecasting Service (SFFS) with the Met Office, with daily Flood Guidance Statements and regional Flood Alerts issued as required to enable communities and responders to reduce the impacts of flooding. SEPA in partnership with the Met Office has developed a public version of the daily Flood Guidance Statement, the Scottish Flood Forecast, to provide better and earlier information to the public. A beta version of this product was launched in May 2022. It will be refined in the wake of user feedback. A more focused version of the product, producing guidance at a local level, is planned for the next flood risk management cycle. Options for developing forecasts of surface water flooding have been published in 2022 to help urban areas and the transport network improve their resilience to and preparedness for flooding. The development and wider roll-out of this service is being considered alongside the technical, resource and communication challenges associated with providing surface water flooding guidance.</p> |
| Awareness raising | G | <p>SEPA, the responsible authorities and other organisations such as the Scottish Flood Forum work together through national and local initiatives to help communities understand the risk of flooding and what actions individuals can take. Improved awareness of flood risk and actions that prepare</p> | Responsible Authorities | <p>SEPA</p> <p>SEPA has delivered a range of awareness raising activities through campaigning, education activities and partnership delivery. SEPA have run national and local digital and direct engagement campaigns to raise awareness of flood risk and SEPA's flood warning service, Floodline. SEPA publish and publicise an electronic newsletter (Flooding Gateway) four times a year which is distributed to a wide audience. SEPA are working with Education Scotland and Scottish Government Resilience team to embed flooding awareness within the Curriculum</p> | <p>SEPA</p> <p>SEPA continued to raise awareness of flood risk through campaigning, developing education and engagement tools, creating new partnerships and improving the flood warning and forecasting service. Many of SEPA's awareness raising activities will continue. The focus will be on promoting flood warning and forecasting service, innovation, education and engagement with partners, customers and the public.</p> <p>Dumfries and Galloway Council</p> <p>DGC have held a number of awareness raising sessions across a range of end users, and have worked with partner agencies where applicable.</p> |

| Action | Status | Description | Delivery Lead | FINAL REPORT | Planned actions to complete / address delay |
|--------|--------|--|---------------|--|--|
| | | <p>individuals, homes and businesses for flooding can reduce the overall impact of flooding.</p> <p>Local authorities undertake additional awareness raising activities when developing any specific project proposals and will engage with community resilience groups and local communities.</p> <p>Scottish Flood Forum support flood risk communities by raising community awareness, promoting self-help, developing community groups and establish a recovery support programme after a flood.</p> | | <p>for Excellence, and resilience partners in Safer Communities programmes. SEPA have also developed an online tool that helps everyone share information on current flooding issues (Report-a-Flood). SEPA have worked in partnership with local authorities, emergency services and community organisations (e.g., Neighbourhood Watch Scotland, Citizens Advice Scotland and others) to share our resources and help to promote preparedness and understanding of how SEPA manage flood risk in Scotland. SEPA have actively supported the Scottish Flood Forum and worked closely with UK agencies to develop joint flooding information. In association with the launch of the Flood Warning Schemes, SEPA engaged with the local community to raise awareness of flood risk and encourage uptake of targeted flood warnings.</p> <p>Dumfries and Galloway Council</p> <p>DGC officers attended a number of Community engagement sessions to promote weather related issues, and what actions are available.</p> <p>Scottish Borders Council</p> <p>SBC now operates and continues to set up resilient communities' schemes in the Borders, signing up 46 of 67 community areas within the Scottish Borders. The Council worked with FloodRE in some Border Towns to increase awareness of the new Flood RE Insurance Scheme which provides affordable insurance scheme for those properties at Flood Risk. Scottish Borders Council continues to work closely with flood action groups and resilience groups to encourage actions to raise awareness of flood risk within the Scottish Borders. This includes letter dropping and attending Community Council and Local Flood Group Meetings</p> | <p>Winter Workshops have been held with councillors, and community councillors to raise awareness of severe weather incidents and promote joint working / best practices.</p> <p>Winter Roadshows have been held across the region to promote what actions the public should take during severe weather events.</p> <p>School workshops have been held with local schools to promote flooding response.</p> <p>DGC will continue to raise awareness of the 'Flood Subsidy Scheme' to provide the community with subsidised property flood resilience products.</p> <p>Scottish Borders Council</p> <p>SBC will continue to raise awareness of flood risk through flood schemes and flood studies, liaising closely with the public in the areas being assessed. SBC will continue to work closely with flood action groups and resilience groups to encourage actions to raise awareness of flood risk. The Council will continue to raise awareness of the Council-run Subsidised Flood Product Scheme to provide affordable Property Flood Resilience Measures. SBC will also continue to work on the resilient communities' initiative, with priority in working with the remaining 21 communities to introduce resilient community groups in those areas.</p> <p>East Ayrshire Council</p> <p>Continue as before.</p> <p>Scottish Water</p> <p>Scottish Water are continuing to support SEPA and Local Authorities in their awareness raising activities. General awareness raising is carried out through the Scottish Water website and national advertising campaigns to increase public awareness of the implications of their actions on sewer flooding. For site specific capital projects and local studies, targeted public engagement is being carried out at a local level.</p> |

| Action | Status | Description | Delivery Lead | FINAL REPORT | Planned actions to complete / address delay |
|------------------|--------|---|-------------------------|--|---|
| | | | | <p>East Ayrshire Council</p> <p>General Awareness raising is a continuous activity via ARA website for all Ayrshire.</p> <p>Supporting flood groups in New Cumnock is a monthly activity, we produce a monthly Newsletter of progress on the scheme and also contribute flooding updates to the ARA monthly Newsletter. All of these are available to elected members and the public.</p> <p>The community has formed the New Cumnock Flood Working Party, to help raise awareness of flood risk in the area</p> <p>Scottish Water</p> <p>Scottish Water will support SEPA and responsible authorities with their awareness raising activities as required and provide targeted communications for Scottish Water sewer flooding programme activities. Scottish Water will raise awareness by producing and supplying targeted information to the public on large capital projects and detailed local studies.</p> | |
| Self help | G | Everyone is responsible for protecting themselves and their property from flooding. Property and business owners can take simple steps to reduce damage and disruption to their homes and businesses should flooding happen. This includes preparing a flood plan and flood kit, installing property flood resilience, signing up to Floodline and Resilient Communities initiatives, and | Responsible Authorities | <p>Dumfries and Galloway Council</p> <p>To date the number of requests for surveys from interested property owners is sitting at over 580 across the region, with a vast majority of those going on to purchase some form of PFR.</p> <p>Scottish Borders Council</p> <p>SBC operates a subsidised Flood Product Scheme throughout the Scottish Borders to offer all residents' access to affordable Property flood resilience. This is promoted through attendance at community meetings and undertaking visits to properties as requested. Scottish Borders Council Emergency Planning continues to promote and implement the Resilient Communities</p> | <p>Dumfries and Galloway Council</p> <p>DGC continue to promote and provide premises owners across the region access to subsidised property flood resilience measures as part of its scheme http://www.dumgal.gov.uk/article/15833/Preparing-for-flooding.</p> <p>Scottish Borders Council</p> <p>SBC will continue providing a Subsidised Flood Protection Product Scheme throughout the Scottish Borders to offer all residents access to affordable flood products https://www.scotborders.gov.uk/downloads/download/73/flood_protection_products.</p> <p>East Ayrshire Council</p> <p>Ongoing community PFR training, Flood Warden/Scouts and resilience group promotion.</p> |

| | | available for public inspection. Scottish Water undertake inspection and repair on the public sewer network. Asset owners and riparian landowners are responsible for the maintenance and management of their own assets including those, which help to reduce flood risk. | | <p>DGC have carried out clearance works where flood risk will be significantly reduced, DGC have undertaken a number of CCTV inspections of piped watercourses and installed access points for maintenance.</p> <p>Scottish Borders Council</p> <p>SBC has carried out water course inspections of 128 of 129 (99%) watercourses within the Scottish Borders as well as undertaking clearance and repair works to reduce flood risk as per Section 18, Clearance & Repair Schedule. The Council also undertakes inspections of other flood mitigation measures and has undertaken 15 of 15 (100%) inspections of flood protection schemes within the Scottish Borders</p> <p>East Ayrshire Council</p> <p>EAC has 60 number Culvert screens of which 14 number cause sufficient issues to be inspected and cleared on a weekly basis. The remaining 46 are inspected and cleared every 6 months. (Bi-annually)</p> <p>Additionally EAC carry out approx. 40 km length watercourse inspections Bi-annually, and action any issues identified, actions vary from notifying Riparian Landowners to taking direct action where appropriate</p> | <p>Scottish Borders Council</p> <p>SBC continue to undertake a regime of watercourse inspections on a risk-based approach, updating and publishing online the Section 18 Clearance & Repair Schedule and undertaking the necessary repairs to reduce flood risk</p> <p>East Ayrshire Council</p> <p>Local authorities have a duty to assess watercourses and carry out clearance and repair works where such works would substantially reduce flood risk. They produce schedules of clearance and repair works and make these available for public inspection. Scottish Water undertake risk based inspection, maintenance and repair on the public sewer network. Asset owners and riparian landowners are responsible for the maintenance and management of their own assets including those which help to reduce flood risk.</p> |
| Emergency plans / response | G | Many organisations, including local authorities, the emergency services and SEPA provide an emergency response to flooding. Emergency plans are prepared and maintained under the Civil Contingencies Act 2004 by Category 1 and 2 Responders and are coordinated through regional | Category 1 & 2 Responders | <p>Dumfries and Galloway Council</p> <p>D&G Local Resilience Partnership has adopted a Graduated Response Plan for Severe Weather events, predicated on the warnings / alerts issued by the Met Office and Scottish Flood Forecasting Service. These Graduated arrangements allow responders to come together and prepare for Severe Weather events rather than responding in a reactive manner as was the norm previously. The model is seen as good practice and has been adopted by other areas and organisations in</p> | <p>Dumfries and Galloway Council</p> <p>With regards to flood warning areas locally, there are established arrangements for the River Nith and specifically Whitesands, Dumfries, which are tried and tested in terms of a coordinated response. For the newer Warning Schemes such as the Esk and the Cree, and also the various Coastal Flood Warning areas along the Solway, it is hoped that plans similar to the River Nith plan can be developed which will allow Responding agencies to respond to more significant flooding events in an informed and coordinated manner. Currently, these newer Flood Warning Schemes are in the process of "bedding in".</p> |

| Action | Status | Description | Delivery Lead | FINAL REPORT | Planned actions to complete / address delay |
|------------------------|--------|--|--|--|---|
| | | and local resilience partnerships, often supported by voluntary organisations. They set out the steps to be taken to maximise safety and minimise impacts during flooding. Emergency plans may also be prepared by individuals, businesses, organisations or communities. Scottish Water is a Category 2 responder under the Civil Contingencies Act 2004 and will support regional and local resilience partnerships as required. | | <p>Scotland, such as Ayrshire Local Resilience Partnership and Police Scotland Emergency Planning.</p> <p>Scottish Borders Council</p> <p>Reviewed and updated Severe Weather Plan in July 2018. This included review and update of the Council's emergency response procedures, flood gate procedures and flood warning procedures. Introduced strategic severe weather co-ordination group to co-ordinate emergency response. Initiated co-ordinated approaches during emergency situations, including named Storms, with representation from all Category 1 and Category 2 responders including Scottish Water, Emergency Services and voluntary groups through the Joint Agency Control Centre (Bunker) at SBC Headquarters.</p> <p>East Ayrshire Council</p> <p>Emergency Response Planning is carried out by Ayrshire Civil Contingencies Team (ACCT) this is an all Ayrshire shared service.</p> <p>ACCT update and co-ordinate (all Emergency Responders) the emergency response plans (ERP) as required (in direct consultation with ARA, where appropriate).</p> <p>In addition to the ERP EAC has implemented a system of river monitors in known areas and a rota of Flood Scouts (FS). Is maintained who are tasked to monitor and report back on status on receipt of any alarm.</p> | <p>Scottish Borders Council</p> <p>SBC to continue to revise and develop relevant Emergency Plans as new information becomes available. SBC will also continue to undertake duties as Category 1 responders under the Civil Contingencies Act 2004 and contribute towards Resilience Partnership groups at local and regional levels.</p> <p>East Ayrshire Council</p> <p>Providing an emergency response to flooding is the responsibility of many organisations, including local authorities, the emergency services and SEPA. Effective management of an emergency response relies on emergency plans that are prepared under the Civil Contingencies Act 2004 by Category 1 and 2 Responders. Scottish Water are a Category 2 responder under the Civil Contingencies Act 2004 and will support regional and local resilience partnerships as required. The emergency response by these organisations is coordinated through regional and local resilience partnerships. This response may be supported by the work of voluntary organisations.</p> |
| Planning Policy | G | Local authorities, SEPA and Scottish Water all have a responsibility under the Flood Risk Management (Scotland) Act 2009 to support sustainable flood risk management through the | Planning Authority – Local Council Authority | <p>Dumfries and Galloway Council</p> <p>All Planning Authorities within the LPD continue to ensure that new developments satisfy relevant guidance and policies on flooding and drainage.</p> <p>The DGC Local Development Plan 2 was adopted in October 2019 and the written policies give guidance on</p> | <p>Dumfries and Galloway Council</p> <p>The Council's planning policies will be reviewed periodically to ensure that all current national policies are implemented and that the recommendations of strategic studies are considered.</p> |

| Action | Status | Description | Delivery Lead | FINAL REPORT | Planned actions to complete / address delay |
|--------|--------|--|---------------|---|---|
| | | <p>land use planning process. National planning policies set out the Scottish Ministers' priorities for the development and use of land. Under this approach, new development in areas with medium to high likelihood of flooding should generally be avoided. Current national planning policies aim to restrict development within the floodplain and limit exposure of new receptors to flood risk, promote flood reduction via natural and structural flood management measures and restoration of natural features, and avoid increased surface water flooding through sustainable drainage and the minimisation of impermeable surfaces. Locally determined planning policies may place further requirements within their area of operation to restrict inappropriate development and prevent unacceptable risk.</p> | | <p>all aspects of development, with a view of supporting sustainable development, including the reduction of overall flood risk by avoiding areas at risk of flooding.</p> <p>Scottish Borders Council</p> <p>SBC will provide advice as the local flood authority on local planning publications within the Scottish Borders, including the Housing Supplementary Guidance and the Main Issues Report which supplements the Local Development Plan 2, ensuring that these assess all aspects of flood risk, encourage sustainable flood risk management and comply with Scottish Planning Policy and the FRM Act 2009. SBC Flood & Coastal Management Team will provide advice as the local flood authority on all relevant planning applications, ensuring there is an appropriate assessment of all aspects of flood risk, encourage sustainable flood risk management and comply with Scottish Planning Policy and the FRM Act 2009.</p> <p>SEPA</p> <p>SEPA continues to exercise its planning functions with a view to reducing overall flood risk. We effectively contribute to the delivery of sustainable flood risk management and we support the delivery of FRM Plans and Local FRM Plans. In line with the management actions that accord with national planning policies, we have and will continue to object to development at medium to high risk of flooding when it is contrary to the risk framework set out in Scottish Planning Policy. We have and will continue to engage from the start of the development plan process and encourage planning authorities to undertake a Strategic Flood Risk Assessment to inform their spatial strategy. We remain committed to exercising our planning functions with a view to reducing overall flood risk, and when a new national planning</p> | <p>Scottish Borders Council</p> <p>SBC will continue to provide advice on all relevant planning applications and local planning publications within the Scottish Borders, ensuring that all aspects of flood risk are assessed, encourage sustainable flood risk management and comply with Scottish Planning Policy, Local Council Policies and the FRM Act 2009.</p> |

|--|--------|---|---------------|---|--|
| | | | | policy context is finalised later in 2022 via the National Planning Framework 4, we will take the same approach. | |
| Strategic Mapping and Modelling (surface water) | A | SEPA will be seeking to incorporate additional surface water hazard mapping information into the flood maps to improve understanding of flood risk. Approximately 2,100km ² of improved data is currently available within this Local Plan District. | SEPA | SEPA's current Surface water hazard maps use design rainfall estimates based on FEH99 methodology, this has now been superseded by FEH22 methodology. The FEH22 dataset contains the latest science and understanding of rainfall across Scotland and represents a significant change in rainfall amounts compared to FEH99 dataset, as such it is no longer consider appropriate to deliver this action as originally intended. This action will not be taken forwards as described. A major national update of the surface water maps is underway which will deliver updated surface water flooding maps for Scotland representing the latest scientific understanding. | The national surface water flooding modelling project will be completed in 2023. The outputs from this will be used to update SEPA maps early in cycle 2 and will inform SEPA's flood risk assessments for the next flood risk management cycle. |

Table 3: Progress with LPD-wide Actions for the Solway Local Plan District

Progress with PVA-specific Actions

This section sets out an assessment of the progress towards implementing actions that are specific to each of the 26 PVA as shown in Figure 2. Assessments of the progress of actions within each PVA are presented.

There are no specific actions identified for 'property flood resilience measures' or 'site protection plans' actions. Consideration of property flood resilience measures will be included in the 'flood protection study', 'surface water plan / study' and / or 'emergency plans / response' actions. Site protection plans will be identified through these same 'study' actions and also 'planning policies' action.

 Reproduced from Solway Local Plan District Flood Risk Management Strategy, SEPA (December 2015).

Summary of Progress for Langholm

There are approximately 180 residential properties and 20 non-residential properties at risk of flooding. The Annual Average Damages are approximately £300,000. Further information can be found in LFRMP under PVA 14/04. Page 53 of the SLPD Local Flood Risk Management Plan

(<http://www.dumgal.gov.uk/flooding/>)

Key Progress in reducing impacts of flooding since publication:

- The council and other responsible authorities continue to progress relevant LPD-wide actions for this area as detailed in Table 3.
- A new flood warning service for the River Esk was completed, with flood warning areas provided for Langholm (Esk) and Langholm (Wauchope).
- Consultant has been appointed to progress a scheme to outline design and flood order.
- Assessment of flooding at Holmwood, Langholm is complete. PFR is programmed to be installed in affected properties late 2022.

| Action | Status | Description | Delivery Lead | FINAL REPORT | Revised dates and planned actions to complete / address delay |
|---------------------------------|--------|--|---------------|---|--|
| Flood Protection Scheme / Works | A | It is recommended that the council progress work on the proposed flood protection scheme in Whitesands, Dumfries. Over a number of years Dumfries and Galloway Council have commissioned a number of studies to examine and understand the flooding issues | DGC | Scottish Ministers confirmed the Scheme without Modifications in March 2020, after reviewing the outcomes of the Public Local Inquiry (PLI) held in late 2018, DGC issued formal notification of the Scottish Ministers decision in 2020. | Timescales and prioritisation of Schemes is currently being considered by DGC to ensure delivery. If the scheme is given a commitment to proceed, a realistic timescale would not see construction until 2025/2026. |

Summary of Progress for Spittal

There are approximately less than 10 residential properties at risk of flooding. The Annual Average Damages are approximately £26,000. Further information can be found in LFRMP under PVA 14/16. Page 187 of the SLPD Local Flood Risk Management Plan (<http://www.dumgal.gov.uk/flooding/>)

Key progress in reducing the impacts of flooding since publication:

- The council and other responsible authorities continue to progress relevant LPD-wide actions for this area as detailed in Table 3.

Summary of Progress for Kirkcudbright

There are approximately 90 residential properties and 40 non-residential properties at risk of flooding. The Annual Average Damages are approximately £240,000. Further information can be found in LFRMP under PVA 14/22. Page 249 of the SLPD Local Flood Risk Management Plan (<http://www.dumgal.gov.uk/flooding/>).

Key progress in reducing the impacts of flooding since publication:

- The council and other responsible authorities continue to progress relevant LPD-wide actions for this area as detailed in Table 3.
- Draft Shoreline Management Plan was put to public consultation between June and September 2022. Updated Plan to be publish in summer 2023.

Other actions

This section sets out details of additional significant actions undertaken in the LPD by local authorities to contribute to the implementation of the current actions in the plan and the achievement of the objectives in the plan.

Dumfries and Galloway Council have two particular areas of road flooding that have bespoke procedures in place:

- The first being the A716 – Kilstay Bay procedure. The road is subject to coastal flooding which inundates the road leaving a lot of gravel and rock debris behind after events. SEPA issue Flood Warnings for West Luce Bay which triggers a council procedural response initiating a road closure.
- DRAX manage the Galloway Glens hydro system and provide warnings to local landowners, the council and SEPA based on water levels in the Water of Deuch. The first stage of warning affects agricultural land and the warning provides landowners and land managers with time to move livestock. The second level of warning is issued to the council and SEPA when roads are expected to be impacted. A number of roads are impacted by flooding here and closures of the A762 at waterside point and lochside point, the A712 at Ken Bridge, B7000 High Bridge of Ken and the A713 at Parton Mill and Carsphairn.

Following three significant flood events in December 2013, January 2015 and December 2015, Dumfries and Galloway Council installed a series of temporary concrete barriers and ancillary works including earth embankment in 2016 to retain floodwater within the active floodplain thereby providing immediate protection to 31 properties - equating to over 70% of the village - within Carsphairn and reducing the threat of isolation during any future flood events.

APPENDIX 1: FLOOD RISK MANAGEMENT RESPONSIBILITIES IN SCOTLAND AND THE LEGAL REQUIREMENT FOR THE PUBLICATION OF THIS FINAL REPORT

Flood risk management in Scotland

The Scottish Ministers, SEPA and responsible authorities must exercise their flood risk related functions with a view to reducing overall flood risk (reference Section 1(1) of the Flood Risk Management (Scotland) Act 2009).

Through the preparation of a national flood risk assessment and setting of objectives to reduce the level of flood risk by SEPA, which is published in Flood Risk Management Strategy, and the publication of Local Flood Risk Management Plans by 'lead' local authorities, which detail how and when the actions agreed to meet these objectives are to be done, SEPA and all responsible authorities must act to manage flood risk in a sustainable way.

Flood Risk Management Strategy for Solway Local Plan District

Local Flood Risk Management Plan for Solway Local Plan District

Legal requirement

This document sets out the conclusions of the review of the Local Flood Risk Management Plan (LFRMP) for the Solway Local Plan District (LPD) as required by Section 38 of the Flood Risk Management (Scotland) Act 2009 (the "Act").

38 Local flood risk management plans: FINAL REPORT

(1) Not earlier than 5 years and not later than 6 years after a local flood risk management plan is finalised, or by such other date as the Scottish Ministers may direct, the lead authority must publish a report on the plan containing —

(a) an assessment of the progress made towards implementing the current measures,

(b) a summary of the current measures which were not implemented, with reasons for their non-implementation, and

(c) a description of any other measures implemented since the plan was finalised which the lead authority considers have contributed to the achievement of the objectives summarised in the supplementary part of the plan.

(2) The lead authority must make copies of the report available for public inspection.

Solway Local Plan District Local Flood Risk Management Plan 2016-2022: FINAL REPORT

The FINAL REPORT is published by the 'lead authority' as defined by Section 34(9) of the Act in partnership with SEPA and the 'responsible authorities', as defined by Section 5 of the Act, will be in the LPD. The approval of the FINAL REPORT will be in accordance with the agreed governance arrangements in the LPD. The responsible authorities for the Solway LPD are:

- Dumfries and Galloway Council (lead authority)
- South Ayrshire Council
- South Lanarkshire Council
- East Ayrshire Council
- Scottish Borders Council
- SEPA
- Forestry and Land Scotland
- Scottish Water.

Publication

The published FINAL REPORT for the Solway LPD LFRMP will be made available for public inspection, as per Section 37(2) of the Act, via the website of the lead authority, Dumfries and Galloway Council:

<http://www.dumgal.gov.uk/flooding>; search for "FINAL REPORT LFRMP".

Links to the published FINAL REPORT for the Solway LPD LFRMP will also be provided from Scottish Government, SEPA and other responsible authority websites.

A hard (paper) copy of the published FINAL REPORT for the Solway LPD LFRMP is also available for public inspection on weekdays between 9am and 5pm at the following location(s):

- Stranraer Library DG Customer Services, N Strand Street, Stranraer DG9 7LD
- Dumfries and Galloway Council, Ewart Library, Catherine Street, Dumfries, DG1 1JA.

Copies of the published FINAL REPORT for the Solway LPD LFRMP may also be available at offices of other responsible authorities. It is advised that the responsible authority be contacted to make such arrangements.

Detailed arrangements for publication of the FINAL REPORT for Solway LPD LFRMP are in Appendix 2.

APPENDIX 2: PUBLICATION DETAILS (SOLWAY LPD EXAMPLE)

Flood Risk Management (Scotland) Act 2009

Publication of FINAL REPORT for the Solway Local Flood Risk Management Plan –

Summary of Proposed Communications Activities

The following communications activities will be used to publicise and make the FINAL REPORT available:

- Upon finalising the FINAL REPORT for the Solway Local FRM Plan, Sections 38(2), 53 and 54 of the Flood Act also specifically require Dumfries and Galloway Council, as the lead authority, to
 - Publish a FINAL REPORT on the Solway Local FRM Plan;
 - Make copies of the FINAL REPORT available for public inspection free of charge and at all reasonable times;
 - Publicise the arrangements for making it available by means of a notice in the appropriate newspapers (at least one Scottish newspaper and such local newspapers within the LPD as considered appropriate)
- The FINAL REPORT for the Solway Local FRM Plan will be published in an online format and will be made available on the Council's website at <http://www.dumgal.gov.uk/flooding>
- A pdf version will be sent to SEPA and the Scottish Ministers.
- Each community council that falls within a PVA will be notified by email of the publication of the FINAL REPORT and how to access it electronically.
- Announcements will be posted on social media (the Dumfries and Galloway Council Facebook and Twitter pages).
